**Subject:** LCP Chemicals Inc. Superfund Site, Linden NJ. Site Visit, July 22nd.

Good afternoon.

I understand that Jay Wolfkind, of Cherokee LCP Land, LLC and his consultant will be meeting John Enright of Conrail and his engineer tomorrow at the LCP Site in Linden, NJ.

Apparently the meeting is to review the area where Conrail plans to install some new tracks near/on the LCP property.

I understand that you will be walking down the Conrail tracks just to the south of the LCP property, and that you will not enter the fenced in areas of the LCP property. If that is the case, EPA has no issue. I only ask that everyone enter and leave the area together.

As you know, the LCP property contains areas that pose a potential hazard from both direct exposure to mercury and also from the dilapidated buildings. No one may enter the fenced area without EPA's permission and appropriate HAZWOPER certification.

If there is any uncertainty as to where you may and may not enter, please let me know. Unfortunately I cannot meet you at the site, but I can be reached all day tomorrow at 917 513-1538.

To avoid any confusion in the future, please let me know a few days in advance when you plan on visiting the LCP Site.

Thanks,

Jon Gorin
